The material "PU-B/2" complies with the following requirements:

- Regulation 1935/2004/EC as amended on materials and articles intended to come into contact with food.
- the Regulation 2023/2006/EC of 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

These above-mentioned regulations apply in conjunction with:

- Regulation (EU) No. 10/2011, in the amended current version, on plastic materials and articles intended to come into contact with food and its amendments,
- the US FDA - authority as defined in CFR 21 § 177.2600,
- the test reports on the determination of the migration of the components of plastic consumer goods (with the total and specific migration values), carried out by an independent laboratory.
- The migration values were determined in the course of multiple contacts with all food types for a contact duration of 30 minutes and in a temperature range of [-40°C to +100°C].

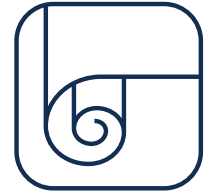

The above-mentioned product, manufactured according to good manufacturing practice, complies with the general requirements of Regulation 1935/2004/EC, so that under normal and foreseeable conditions of use, no constituents are released onto food in quantities that are likely to,

- (a) endanger human health; or
- (b) bring about an unacceptable change in the composition of the food; or
- c) cause an impairment of the organoleptic properties of the food.

In this respect, the product is suitable for contact with all types of food.

# DECLARATION OF CONFIRMITY

## DECLARATION OF CONFIRMITY OF THE MATERIAL PU-B/2

It further applies:

- This declaration is understood with the proviso that the storage, further processing and use comply with the specific characteristics of the materials or articles and the general rules of use and the reasonable and proper handling of the materials or articles.
- The person to whom this declaration is addressed must ensure that this declaration continues to be in agreement with the product, especially if the product itself is modified, subjected to other modifications, or used under conditions of use other than those for which it was intended, e.g. other than a conveyor belt.

This declaration has been prepared on the basis of the following elements:

- Declarations of the suppliers of the starting materials and raw materials.
- Analysis of compliance with overall migration values
- Analysis of substances subject to restrictions or specifications (in particular specific migration values)

Presence of dual use additives (substances approved both as additives for plastics and as food additives "dual use substances): Silicates, stearic acid & titanium dioxide.
